

Second Quarter 2009 Employment & Sales Survey

To ensure the confidentiality of company data submitted by survey participants, ASA has partnered with the Inavero Institute for Service Research to tabulate results and derive cumulative figures. ASA does not have access to company submissions, and reports only aggregate results.

Survey participants receive an exclusive report on the survey results, which includes payroll data available nowhere else.

If at any time, while you are filling out the survey, you need to go back to a previous screen, you can select the “back” button on your browser so that the questionnaire will return to the previous page.

For technical questions regarding this survey instrument, contact Inavero at 800-921-2640.

For general questions about this survey, contact Alexandra Karaer, ASA director of research, at 703-253-2048 or akaraer@americanstaffing.net.

Instructions & Definitions

Please enter figures for all branches, franchises, and licensed operations in the U.S. (including Puerto Rico and the Virgin Islands). Include all occupational categories, such as health care, industrial, IT/technical, office-clerical, and professional-managerial.

Temporary and contract staffing is defined as a service whereby your company hires its own employees (W-2 workers—not 1099 independent contractors and not employee leasing) and assigns them to work for clients. This may involve supporting or supplementing a client’s work force to keep it fully staffed during busy times, gaining special expertise or staffing special projects, filling temporary vacancies, or temp-to-hire arrangements.
